

Easy E-book Creation Program

Someone Finally Makes Sense Out Of Creating Your Own Information Products!

As the movie said..."Show Me The Money"! I have always thought that the money was in selling other peoples products and ebooks, but I was wrong. Now I am creating my own info products and ebooks.

This activity has provided me with enough extra money to pay for a family holiday each year, but like most affiliate marketers, I sometimes felt that I was 'digging someone else's ditch'! In other words, I felt that if I was going to be using my spare time to sell other people's info products and ebooks for a commission, I could just as easily be selling my own ebook and receive 100% of the sale value rather than the usual 40% - 50% I'd been getting by promoting someone else's product.

There were just a few snags. I'm not a techy type person by any means and so I had no idea whatsoever about how to create an ebook of my own. Also, I had no idea how to create a professional looking info product, let alone how to get it to market or how to place it for sale online. All that technical stuff leaves me cold and there was of course another problem...

Now what do I create my ebook about or my info product?

I wanted to find someone out there that would teach me how to do this...sort of look over my shoulder approach. Let me tell you, there isn't anybody out there that will let you do this...until I came across Roy.

The whole process sounded way too complicated and I was about to just throw in the towel and continue selling the other peoples info products and ebooks. Then I was redirected to one of the best sites anywhere on ebook and info product creation.

I nearly gave up on the idea, but decided to continue my search for some help in the matter. I came across one website where a course was being offered that seemed to be what I wanted....then I scrolled down the page and saw the price...\$1,247.00!!!

How am I suppose to make money if I have to spend that kind of money just to get up and running. I continued looking for over 2 1/2 weeks when I came across a banner that read..."The 6 Week Course That Is Changing People's Lives!"

So I clicked on it and it took me to Roy's site. I could identify with the him on his story so it was like he was just talking to me. It was another course on how to create your own information product and start making real money. It was a step-by-step approach which I definitely needed.

So I went to the bottom quickly just to see how much this amazing little jewel was going to cost me and I was floored. Compared to the other program that I was tempted to buy, this was a lot more affordable...a lot more affordable. This program was going to allow me to create as many info products and ebooks that I wanted.

I bought the program and read lesson one. I followed the lesson to the "t" and when I was done, I was eagerly awaiting the arrival of lesson 2 in my email box. I did this step-by-step process and so it was a lot easier than what I was originally thinking.

The upshot is, that I completed the course and now have my own info product (and in a niche that I previously knew nothing about!), and I will be launching it to a hungry audience in a few days time.

I have had hundreds of blog request from individuals in the same boat that I was in and are eager to find out how to make their own info product and ebook.

About the Author

When you are serious about developing your own [E-books](#) or [information products](#) then you need to examine the the 6 week course here. You get a lesson every week and you will be developing your own E-books and information products in six weeks or less.
