

## Advantages Of Warcraft Omen In Wow

WoW Omen is the threat meter indicator of the character. It is the meter that helps opposition decides on which player to attack next, depending on the hazard each character faces and skill they use.

Omen rightly evaluates the group important threat levels of every individual enemy. It also helps the players to anticipate when they are in complete danger while attack from the opposition. It also helps warn the player if they are next in the line of targets.

This kind of information is of great help in times of marauds and can help tanks escape and endure attacks. This information is usually very helpful in multi-player situations.

Depending on the threat levels of group players, mobs of WoW attack them. Tanks are the most endangered within a group since they are high prone to damage.

This Omen tries to display threats that the player generate and also compare with other members of the group with add on installed. You can also find other threat meter that is KLH Threat Meter.

Features of Warcraft Omen -

Given below are a few of the most important features of Warcraft Omen:

1. Configurable display option helps a player to set the Omen meter to suit their personal needs during the game.
2. It also helps a player filter classes they don't want thus enabling the players to overlook certain categories whose terror they are not interested in.
3. The WoW omen monitors the overall hazard faced, threat per second and virtual threat percentage of a character.
4. Omen also helps players decide when to pull or drop aggro, with the aggro gain pointer that it has.
5. Back off threat bars helps the player to compare their threat levels to that of a tank. It is easy to understand the bar layout. Omens keeps player from scanning the whole list of character to keeps few of them safe. And just need to stay safe by pulling out the bar from primary display to find the threat levels.
6. Omen at times also displays threats commencing from KLH Threat meters. And even if your team mates don't make use of Omen, you could still monitor the threats posing them.
